

Hello, my name is Natalia and I study in Joaquin Turina Secondary Education College. I'm studying my first year of the 6th form to get my full A levels in science because I want to be an industrial engineer.

I live with my family in Seville. My parents names are Natalia and Miguel, and I've got a younger brother than me, his name is Miguel too.

Some of my main interests are reading fantasy books and manga, watching anime and TV shows. I love watching science and engineering programs on TV too.

I'm a little freak but my friends are too. They say that I'm funny and crazy, this is true but not in a bad way. One thing that I think about me it's that I don't know all about something but I know something about all. I mean, I like learning a lot of things, though it isn't much about the same.

I love sports too, I've done many sports like football, basketball, swimming, dancing, volleyball... At present I don't do any sports because I don't know what to do.

Sometimes I'm a little shy but I hope that we will have a good time together.  
I'll see you soon, Natalia.
