

## Hey everybody!

My name is Katharina and I am fifteen years old. I live in a house in Wolfsberg with my dad, my mother and my elder brother. I am currently attending the sixth grade of the Stiftsgymnasium St. Paul. My favorite subjects are chemistry and physics.

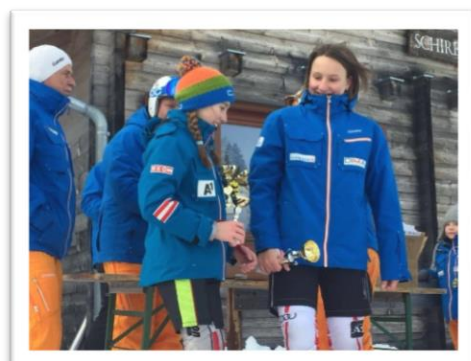

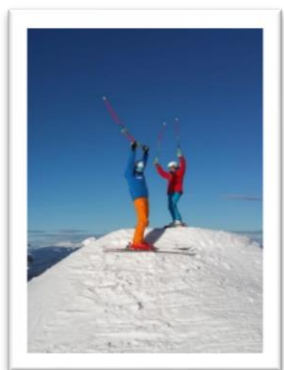

## My hobbies

Some of my hobbies are playing tennis, skiing, running and spending time with my friends. I have been playing tennis since I was three years old and have never given up on it. The best thing about tennis is, that so many teenagers are playing it, so you kind of are in a group. You train together and you play together. There is nothing more exciting than doing sport together with your friends.

My favorite free-time-activity is definitely skiing. When I don't have much to do, my first path is to the slopes. I have been a member in Skiclub Eitweg for eleven years now. With my trainer, I spend a few training sessions a week on "Koralpe". I take part in races and I could already celebrate good results and victories.

Because I have made the education as a "skiing teacher", I can teach and train young kids. That's just great!

## Friends

If my friends described me, they would say that I am a funny and talkative person and that I laugh a lot.
