

# Meet Lucas

Let's Stop Bullying Together

A young man with short dark hair, wearing a white t-shirt with dark sleeves and blue shorts, stands in the center of a gravel path. The path is flanked by dense green foliage and trees, creating a natural, serene setting. The lighting is soft, suggesting late afternoon or early morning.

Lu·cas  
*a nice, simple guy*

Living being for 16 years and counting, lover of photography, music, sports, animals and programming. Naturally shy but there are some exceptions.

# Photography Passion

I've always liked photography and still remember the first camera I used and how I did a couple of stop-motion scenes since it was a new thing to me. Now, I mostly take portraits of my sister (at the image on the right), of landscapes and I'm looking to learn and practice long-exposures. By the end of 2018, I've started using software to lightly enhance my pictures and stepping up my game.

*Douro River, Cinfães*

*Bestança River, Cinfães*

*Nations Park, Lisbon*

# Music

---

I listen to lots of genres such as Pop and Rock, however, I don't enjoy Heavy/Trash Metal and Rap (but I do like some songs). Due to my parents playing the guitar, I decided to learn how to play the drums when I was about 7 years old and still remember a really small concert where nobody could see me thanks to the drums being so big. Unfortunately, I have lost the will to keep playing as I have started to do other things such as playing the piano. I've always liked the piano due to the fact I liked it way more when I knew the songs, other than learning them. As a result, I haven't learnt two songs that I wanted to play as a result of losing the will. Currently, 2 of my favourite songs are *Faster – Within Temptation* and *Hail to the Victor – Thirty Seconds to Mars*.

# Sports

---

As mentioned before, I love sports and yet I dropped out of the off-school ones. My favourite sport is either basketball or volley, but I can't decide. I used to play basketball every school break with my classmates due to the fact that we really like playing although, as I left that school, I barely play it now. I have started playing volley more "seriously" last summer because, on vacations, we're near the beach and there's a volley net and if you don't happen to bring anyone to play with you, it is certain that there will be someone already playing or asking you if they can also play.

# Games

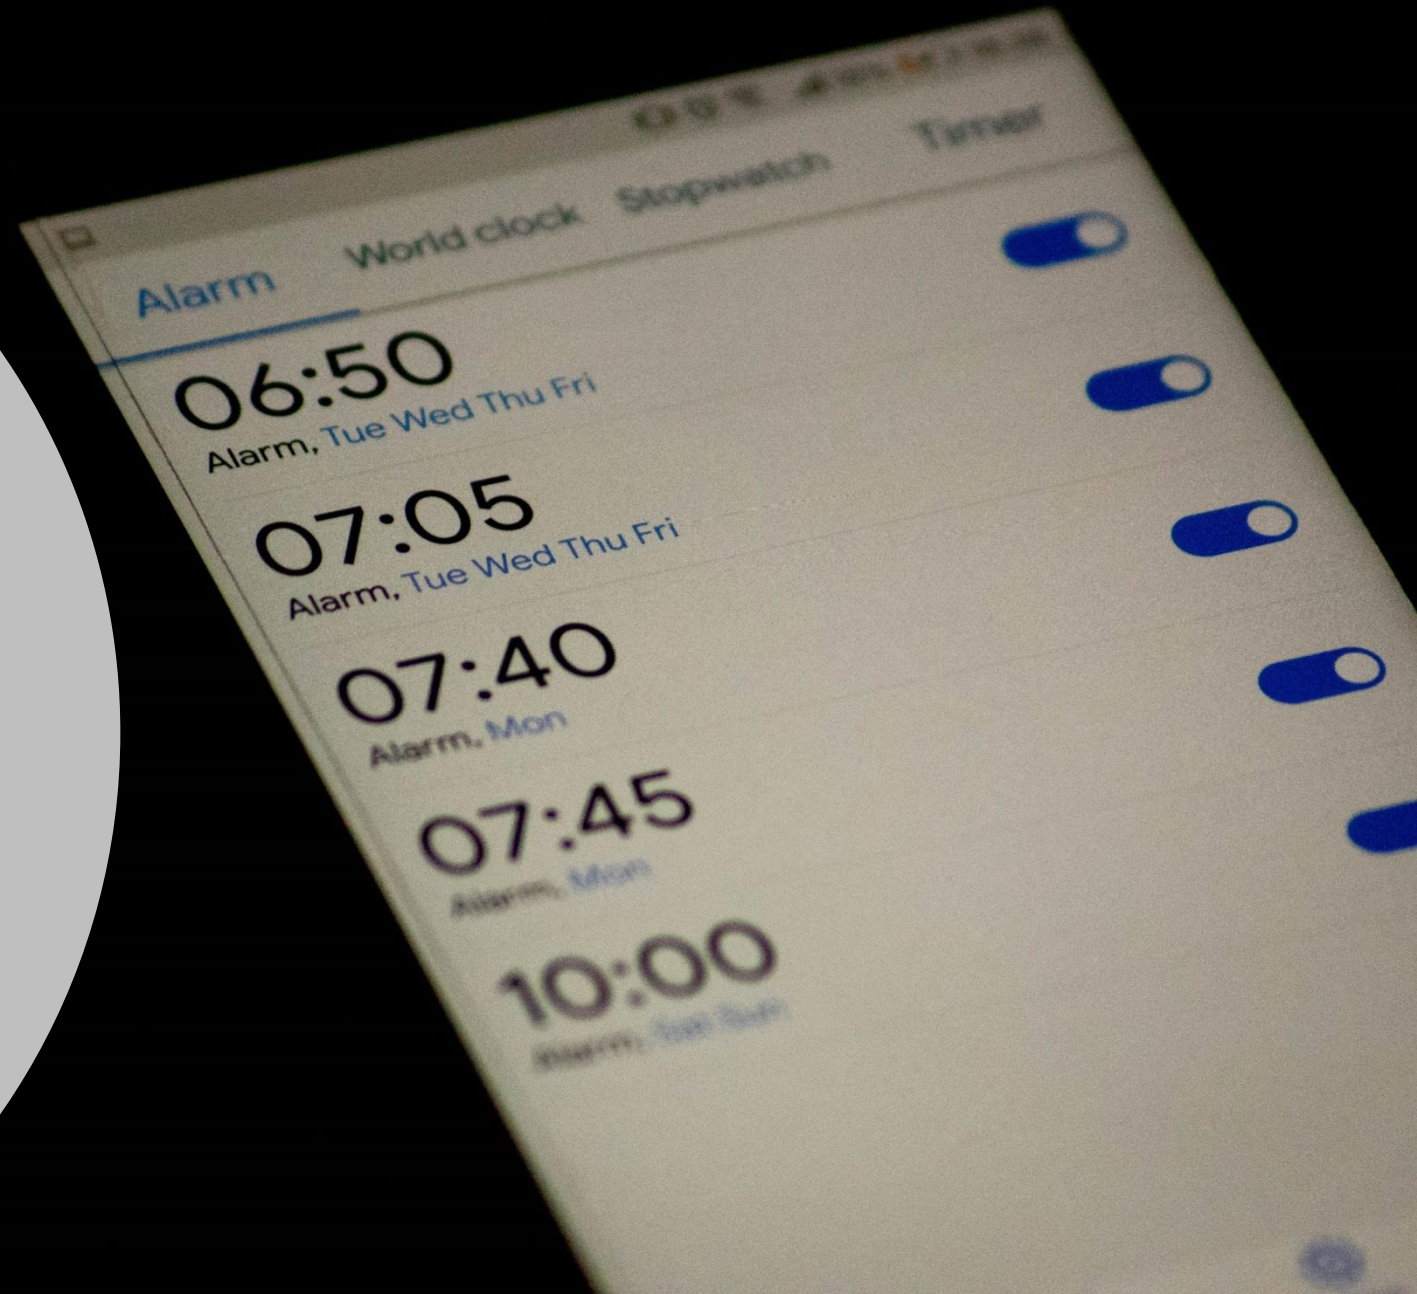

---

As I am in a programming course thanks to my love for programming, I also love knowing how stuff works inside computers. I have spent time looking on YouTube and open-source code to understand how some games work and even do some simple ones by myself. Other than doing that, I also like to play some games and me and my dad are rivals. We have played FIFA for so many years and all those years he has won because I didn't know how stuff worked (mostly football but also the digital game itself) and now I win most of the times. As a logic lover, I also play chess most lunch breaks at school with one of my closest classmates.

# Daily Routine

---

I mostly wake up at 6:50am and leave my bed at 7:05am. Then, I go to the kitchen and prepare my breakfast. Next, I get dressed, wash my teeth and get on going. I take the bus really near my house to the metro and when I get to one of the closest stations near my school, I get off and go on foot. After the morning classes, me and my group of friends go to a near park, Jardim Constantino, to have lunch and then we get back to school. As previously mentioned, we generally play chess on lunch breaks. After school, we separate and me and one of my friends go to the metro where we then follow our own line to home. Just like in the morning, I also take the bus between the metro station and home.

# School Life

---

After getting ready, I grab my backpack and get on going. Usually, I am with a group of closer friends and we work together as a group of 4 in classes, as the tables are, in the majority, for groups. My favourite classes are programming, math and physics and chemistry due to the fact that I enjoy science and technology. Programming is, for me, the easiest one since I understand how and why it works and it's all logic.

```
$app['db.options'] = $tmp;
$db = new \Pimple();
foreach ($app['db.options'] as $name => $structure) {
    if ($app['db.default'] === $name) {
        // we use shortcuts here in case of
        $config = $app['db.config'];
        $manager = $app['db.event_manager'];
        $db[$name] = $db->share(function ($name) {
            return DriverManager::getConnection($config, $manager);
        });
    }
}
```

*Kit Kat*

Turns his face when a camera is pointed, loves eating, being petted and being outside and going after Nina and Rocky. Barks if someone is on the stairs.

*Rocky*

Super shy, kind of makes monkey sounds, discoverer of wardrobes, sleeps where the sun is just like a sunflower. Attacks FIFA players if the game is on the TV.

*Nina*

Really likes being with people and being petted, eating and sleeping. Sometimes lets people work on laptops on the couch but still needs attention.

and that's... Lucas.
